

KEANU ELY GILBERT MANLY

Full-Stack Software Engineer

- Legazpi City, Albay, Philippines
- +63-927-998-5234
- manlykeanu@gmail.com

Full-stack Software Engineer with six years of experience building and maintaining production web applications and APIs. Strong background in full-stack development using React, Next.js, TypeScript, and TailwindCSS on the frontend, with backend expertise in Python (FastAPI) and Node.js (Express). Experienced working with relational and NoSQL databases including PostgreSQL, MySQL, MongoDB, Redis, and Amazon DynamoDB. Hands-on experience deploying and maintaining containerized backend services using Docker on AWS, as well as applications hosted on platforms such as Vercel, Railway, and Netlify. Comfortable owning features end-to-end and collaborating in remote, cross-functional teams to deliver reliable, scalable solutions.

PROFESSIONAL EXPERIENCE

► Software Engineer / Team Lead | Boom AI Solutions OPC

February 2022 – December 2025

- Led sprint planning and cross-functional delivery, improving task distribution and sustaining consistent on-time releases.
- Elevated code quality and team velocity through structured code reviews, shared documentation, and collaborative testing.
- Built and scaled a call analysis platform with APIs and third-party integrations supporting production workloads.
- Converted business requirements into reliable, production-ready systems aligned with long-term platform goals.
- Increased system performance, accuracy, and stability through continuous profiling and optimization.
- Owned production issue resolution as the primary escalation point, reducing downtime through fast root-cause analysis.
- Partnered across engineering, product, and operations to maintain high-availability, stable production systems.

► Software Engineer | Boomsourcing Inc

January 2021 – February 2022

- Executed sprint tasks within an agile framework, ensuring consistent on-time delivery of production-ready code aligned with product roadmaps.
- Built and maintained production components of a call analysis platform, including APIs and third-party integrations.
- Improved system performance and output accuracy through targeted optimizations and refactoring.
- Turned business requirements into reliable, stable, production-ready implementations.
- Contributed code quality by actively participating in code reviews and testing, creating technical documentations.
- Troubleshoot and resolved production defects, performing root-cause analysis to ensure long-term system reliability and stability.

- Completed structured frontend and backend bootcamp training covering development fundamentals, internal tooling, and team workflows.
- Contributed to feature development, testing, and documentation under senior engineer guidance.
- Built and maintained components following clean architecture and maintainability best practices.
- Produced technical documentation to support onboarding and day-to-day development.
- Collaborated closely with teammates during onboarding and early delivery phases before the role was impacted by the pandemic.

SKILLS

Frontend

- JavaScript
- React
- NextJS
- TailwindCSS
- Typescript
- Material UI
- Ant Design
- Magic UI
- Cypress

Database & AI & Cloud

- PostgreSQL
- MySQL
- Redis
- MongoDB
- GPT API
- Amazon
 - Amazon IAM
 - Amazon Cognito
 - Amazon DynamoDB
 - Amazon S3
 - Amazon Lambda
 - Amazon CloudWatch

Backend

- Python
 - Fast API
- Nodejs
 - ExpressJS

Dev Too

- Git
- Docker
- Github / Gitlab
- VS Code Editor
- Notion
- Postman / Insomnia
- Click Up
- Slack

EDUCATION

Bachelor of Information Technology

2014 – 2018

Forbes College | Legazpi City, Philippines

OTHER

- **Certifications:** AWS Cloud Practitioner, Boomcamp Training for Frontend & Backend Course
- **Languages:** English, Tagalog
